Mobile UPS Self-Contained Container "Pods"

Global Power Supply is pleased to introduce mobile UPS self-contained container "Pods" to our UPS rental fleet with two custom constructed, state of the art full turnkey 60kW and 100kW Eaton powered UPS backup battery systems.

Designed to support critical infrastructure facilities like data centers, telecommunications sites, cable companies, medial applications, utility companies, and many more. During equipment upgrades, disaster recovery, or off-grid events this system allows facilities to maintain business backup continuity during these highly critical temporary power events.

Each Pod has (2)60 kW Eaton 93PM-L with 208V, true online, continuous-duty, transformerless, double-conversion, solid-state, three-phase UPS system. Each UPS provides conditioned and uninterruptible AC power to protect the customer's load from power failures. In addition, we have introduced a UPS pod with a single 100kW Eaton 93PM-L.heat loads and optimize energy efficiency.

Each ISO container Pod is shippable without need for permitting. The container is 8' by 10' with recessed doors meeting DOT requirements. Internally the Pods have independent Asco A300 three pole open transition automatic transfer switches rated to 200A 208V, in and out. Also, they are provisioned with a wall mounted heater, thermostat controlled pre-wired exhaust system, and programmable MovinCool Pro air conditioning. Externally the Pods come with connectivity camlock input/output doors for utility, generator in, ups out, 120V outlet and a CAT5 monitoring port.
